Level of difficulty

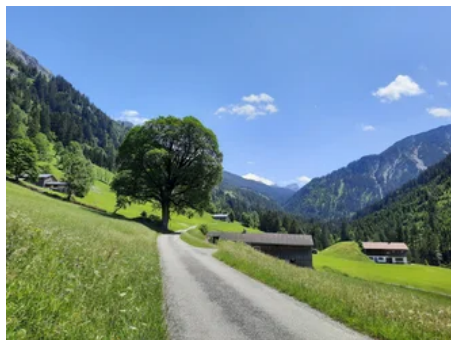

Walking time: approx. 5 hours

Elevation gain: 170 Hm

Description

In addition to its scenic beauty, the Maisäß Garfülla is also impressive for its natural diversity, including stone walls, some mighty individual trees (especially sycamores and ashes), rough pastures and meadows. We return to Marul along the near-natural Marul stream, the Ensch gorge and the forest nature trail. The habitat network is particularly visible here.

Speaker: Günter Bischof, botanist and hiking guide

Venue

Marul Kirche
